-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over the acknowledged prior art (figures 1-5) in view of Suzuki et al. (4,673,272).

The acknowledged prior art differs from the claimed invention in that the acknowledged prior art does not disclose a “sprocket wheel having a gear engagement surface” and “a reduction gear engaging the gear engagement surface of the sprocket wheel, the reduction gear having a lobe thereon.”

Suzuki et al. teaches providing a “sprocket wheel [29b] having a gear engagement surface [217]” and “a reduction gear engaging the gear engagement surface of the sprocket wheel.” It would have been obvious to one of ordinary skill at the time of applicant's invention to provide a reduction gear in the acknowledged prior art. One would have been motivated to so modify the acknowledged prior art to allow a control over the interval that the pulses are generated as taught by Suzuki et al. [see col 5, lns 17-63].
